Passage

Read the following passage and answer two items that follow the passage. Your answers to these items should be based on the passage only.

Lower trade costs, greater facility in communications and information availability have allowed more specialization by firms and the potential to source goods and services globally. Fragmentation and internationalisation of production chains are not new but have grown substantially in recent decades. Such fragmentation allows firms to specialise in specific activities and has thereby allowed some firms to enter global markets since they can produce one part of a final good, or provide a specific service, rather than needing to integrate an entire complex production process. Unbundling of tasks and business functions may have increased the opportunities for developing countries in particular to participate in global value chains as firms in developed countries outsource to more cost-competitive regions. In this way, production takes place in geographical areas and in firms, in closer alignment with their comparative advantage.

Q.74. On the basis of the above passage, the following assumption(s) have been made:
